## ***FILTER MOD. GE***

Handled filter employed for suction and filtration of wood shavings and dust.

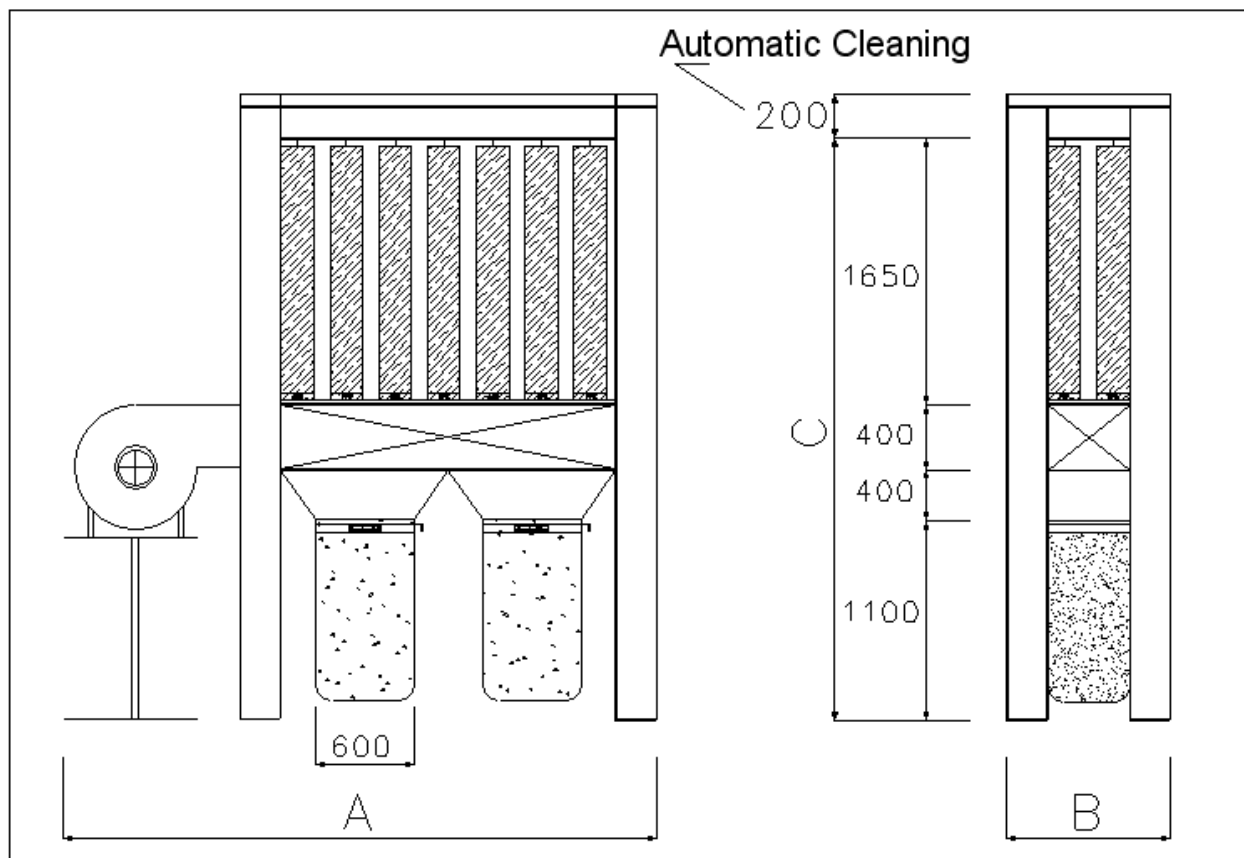

Entirely constructed in zincated sheet pressure folded. Plenum air entry constructed in a single piece, higher and lower legs dismountable to make the transport easier.

The air, after crossing a central plenum, goes out from the wood waste through the handled filters. The waste falls down into the collecting bags for gravity.

Complete with an electrical vane aspirator, sleeves  $\varnothing$  200 h 1600 mm in fabric of genuine cotton 350 gr/m<sup>2</sup> with Snap Ring, collecting bag in nylon  $\varnothing$  600.

Available in many versions and powers, open with handled filters at sight or careened in the higher side with zincated panels and entry door to the filtering zone.

Cleaning system of the sleeves with electrical vibrator available by request in the careened or open version.
